Los Angeles, CA — william.saleh578@gmail.com — (323)-681-5111 — linkedin.com/in/william-saleh578

EDUCATION

University of California, Irvine
B.S Software Engineering

March 2026

Los Angeles Pierce College
A.S.T STEM

June 2023

EXPERIENCE

Compassion International
DevOps Engineer Intern

May 2025 - Aug 2025
Colorado Springs, CO

- Engineered and deployed **AWS-based microservices**, leveraging **API Gateway, Lambda, Step Functions, EventBridge, SNS, SQS, Kinesis, Aurora PostgreSQL, and DynamoDB** with end-to-end **Datadog** observability, supporting **10k+ requests/day**.
- Built and containerized **Go/Python Lambda** functions, provisioning infrastructure with **AWS CDK** and configuring **VPC endpoints, IAM roles, and Route 53 DNS** for internal and external routing, reducing manual configuration time by **30%**.
- Configured **Kubernetes clusters** with **YAML** manifests to manage virtual and route tables through **Gloo load balancer**, automating traffic routing for **10+ microservices** and improving scalability during peak workloads.
- Developed a synthetic traffic generator to simulate production workloads, enabling performance validation and real-time observability monitoring.

UCI - Language and Learning Analytics Lab
Lab Assistant

January 2025 - June 2025
Irvine, CA

- Developed interactive web dashboard using **Next.js, Bun, React, and Tailwind CSS** for AI-collaboration experiment management, supporting **20+ researchers** in designing and monitoring studies.
- Built **Django API** endpoints with Clerk authentication and **PostgreSQL** for secure data storage.
- Deployed application using **AWS EC2 instances and RDS database** with **Terraform and Ansible automation**, reducing deployment time by **40%**.

PROJECTS

Cloud Migration For Tour Business

- Migrated company's booking system and customer data using **Amazon S3 and RDS**, improving data storage efficiency and cutting infrastructure costs by **15%**.
- Utilized **Amazon's Database Migration Service** to seamlessly transfer databases without downtime, ensuring business could easily handle over **50+ bookings**.
- Implemented **AWS IAM** to establish secure access controls, safeguarding hundreds of customer's records
- Monitored system performance using **Amazon Cloudwatch**, reducing server downtime and optimizing resource usage.

UCI Marketplace: *TailwindCSS, Firebase, Bun, Typescript*

- Built a campus-focused buy/sell platform with responsive UI, listing cards, and user authentication via UCI email
- Integrated **Firebase** for secure login and real-time Firestore database to store listings and user data
- Designed **Firestore backend** schema to efficiently store user listings, favorites, and metadata for fast querying and scalability

SKILLS

- Relevant Coursework:** Principles of Operating Systems, Computer Networks, Design and Analysis of Algorithms, Internet Applications Engineering, Data Structure Implementation and Analysis
- Programming:** HTML, CSS, C++, Python, Javascript, Typescript, SQL, Java, Go
- Framework and Tools:** React, Node.js, Git, Linux, Datadog, YAML
- Cloud/DevOps** AWS, Kubernetes, Terraform (IaC), CDK (IaC), Gloo

CERTIFICATIONS

AWS Certified Cloud Practitioner
Google Cybersecurity Professional Certificate

Amazon 2024
Google 2024
